This name can be any name you wish, but if you want it to be easily identifiable, use the the name of the zone. This will be the name that it shows on the First Menu. If you wish to change the Name, you may use the KeyMacro properties or you can select the name from the Name drop-down list on the KeyMacro properties. The Zone.fancyScript method for KeyMacro's has been modified slightly. The method used to include the KeyMacro's will now look like this: '*This method will automatically include each of the KeyMacro's you have specified in the Zone.fancyScript. 'Each KeyMacro must be the first one included in the Zone.fancyScript method. 'Keys will be separated by commas. 'If the KeyMacro's are entered as 'items, spaces in their names will not be included in the final KeyMacro's output. 'If the Key 77a5ca646e
