Count Days is a lightweight and portable application that facilitates a user-friendly interface to help you find out the difference between any two specified dates. It comes in handy if you want to count remaining time until an important upcoming event, such as birthdays, holidays, meetings, or appointments. Simple interface and options It's wrapped in a simple interface made from a normal window with a plain appearance and neatly structured layout, where all options put at your disposal are made visible. All you have to do is indicate a starting and ending date by consulting a calendar, while keeping in mind that the specified dates are also taken into account for the counter. Count years, months, weeks and days It's not mandatory for the second date to be greater than the first, since Count Days makes the calculations regardless. It's capable of showing negative values. Results are computed instantly and displayed in the window, so you can find out the total days, working days, weeks, months and years. Although the app doesn't implement options for printing, exporting or copying all information, you can select text from each box and copy it using the global keyboard shortcut or by opening the right-click menu. No installation necessary The program is packed in a single.exe file that you can save anywhere on the hard disk and just double-click it to run. Another option is to copy it to a pen drive or other removable storage unit to directly launch the tool on any computer with as little effort as possible. It doesn't need DLLs or other components to run, create files on the disk without your permission, or add new entries to the system registry. What can be said about an airport shuttle that's a big mover and shaker? There's no better way to be seen, and to avoid your destination from time to time. That's where transfer shuttle comes in. It can take you from any city to any other, with the expectation that you'll use it every time you want to travel between two destinations. Unlike the usual public transportation or a taxi, these vans are permanently on the road, making you responsible for their transfers from one place to another, and providing them with a comfortable service to make your trip in good comfort. All you need is to make sure that there's a lot of space for you, your luggage and your friends and family. If you've had an experience using airport shuttles, then you know what you need. What if you're the one who is in charge of making the transfers? You will need to make the reservations in advance, check in the luggage, book the seats and handle all the formalities. Now you can make all the arrangements easily through Transfer Shuttle, a program that takes care of all the tedious details for you. The application generates all the bookings, the seats and the itinerary, in an automatic way, making your life easy. With Transfer Shuttle, you have the opportunity to transfer at any time of the day or night, to any destination, whether it's in another city or the country. And if you're transferring from one city to another, you can take advantage of the further features provided by the program. The advantage of making reservations from Transfer Shuttle is that you have a full view of what the prices are, so you can make a better selection. With all this information at hand, you'll be able to book a transfer that suits your budget and needs. The additional features provided by Transfer Shuttle allow you to customize the transfers in advance, so you'll have all the information at hand to make the best decisions. What about changing the itinerary in real time, in case you're feeling unwell or there's been a change in the plan? Transfer Shuttle's compatibility with your computer ensures that you will be able to modify all the data in the system, with the next update of the application. This makes it possible to add new zones, new airports, change the itinerary and change the seats easily, without you having to reinstall the program. Features: * Transfer routes and bookings to/from any airports * Real time searches, city-to-city transfers * Customized transfers * Remove seats from the itinerary in real time * Save trips
